Kick Start Package

\$ 1485 inc GST

*2 years domain name registration,
12 months website hosting,
responsive 1-4 page basic
WordPress website*

WHAT YOU GET - THE SETUP:

A domain name registered for 2 years. Choose .com or .com.au. I'll send you a renewal invoice prior to expiry. This currently costs \$66 including GST for a further 2 years but is subject to change.

Website hosting for 1 year. I'll send you a renewal prior to expiry. This currently costs \$165 for a further 12 months but is subject to change.

NOTE: If you already have a domain and/or website hosting, the start-up price remains the same.

5 email addresses. I'll create the email addresses and provide configuration details. You are responsible for setting up email accounts on your computer/devices. You may need to engage an IT expert.

YOUR WEBSITE

Launch your online presence with a great looking responsive (works on mobile devices) website.

WHAT'S INCLUDED?

Up to 4 pages. Most often these are: Home, Product/Service, News/Blog (or About) and Contact.

Up to 5 stock images. You can buy additional images at \$11 each including GST.

Up to 30 minutes of training via Skype or at my office so you know how to update your site to keep it safe, and minor text changes. Alternatively, I can send you a video on how to do these updates. We do this training and Google stuff after the final invoice is paid and your site is live.

NOTE: I can take care of your basic website maintenance for \$55 per month including GST. (cost subject to change).

A WORD ON SEO

I build SEO friendly websites. However, it takes time for your site to move up the search engine ranks based on a keyword/s search.

SEO works best when you incorporate the key words specific to your business type into your text for each page.

A professional copywriter is highly recommended for best results.

NOTE: YOU need to give me a list of key words as well as including them in your text.

To raise your site rankings you can use additional SEO Optimisation services or a Google AdWords campaign once your website is complete. You will need to engage a specialist for this.

GOOGLE STUFF

I'll help you set up your Google Analytics and add a plugin that will provide a screenshot of your analytics on your WordPress Admin dashboard and add your site to Google Search Console.

THINGS YOU NEED TO PROVIDE

Your Logo – in all the formats you have. If you have a style guide please provide that too.

NOTE: I offer a logo design service if required.

Good quality images if you have particular ones in mind for each or all of your pages. You must own the copyright to these images. Images off Google are not recommended.

Between 300 and 400 words for each page, include as many keywords as possible in ALL your text but match right key words to the most appropriate pages.

A detailed accurate overview – around 300 words describing your product/service - tell me about your customers and how your product solves problems for them.

Contact details including links to your social media accounts.

PAYMENT DETAILS

I'll start your project as soon as I receive a 50% non-refundable deposit. The balance is due before the site goes live and we do our training.

NOTE: If you'd like to contract me for additional work outside the scope of this package. I charge \$99 per hour including GST for graphic design (logo design, business cards, flyers etc.), printing, Powtoons and social media marketing.
